Subject: Bremerton Gas Works Site -difference between Public Health Assessment and Risk Assessment
Difference Between ATSDR and EPA FS 155904 7.pdf

Hi Everyone-

At our meeting regarding the RI/FS Work Plan in Bremerton back on June 2, a question was asked about the difference between the risk assessment work that will be done as part of the remedial investigation of the site and the Public Health Assessment (PHA) being conducted by the Washington State Department of Health (WSDOH). The attached short fact sheet provides a succinct description of the differences between the two efforts. The fact sheet refers to ATSDR; WSDOH is conducting the PHA for the Bremerton Gas Works site under a cooperative agreement with ATSDR.

Bill Ryan
